Mike –

The BER Policy would not apply to this situation. For PCB IAOs you should refer to CFR 40 761.61.

PCB clean up numbers are complicated but 1 PPB would be acceptable for unrestricted use; >25 PPB left in place might require an Institutional control of some type. If you detect PCBs in confirmation samples, call me so we can discuss what needs to be done.

FYI - There are PCBs in this general vicinity of the NIC site.
